TOUCH SCREEN PATIENT MONITOR

INFINIUM

Masimo SET®

OMNI

Intuitive

Designed for a fast paced work environment, the Infinium **Omni™** patient monitor offers an extremely simple and adaptable user interface. Patient information along with vital sign settings can be quickly modified to meet the needs of a patient's changing condition. The **Omni** offers a high resolution 10.1 inch touch screen to optimize the speed of patient care. The user can therefore make quick screen adjustments, set default settings, alarm limits, and manage up to 72 hours of detailed patient data.

Upgradable

From the general floor to high acuity surgeries, the Infinium Omni series patient monitors are designed to fit-in and move amongst many patient care areas. The **Omni™** offers standard measurements of: non-invasive blood pressure, ECG with arrhythmia detection, Masimo SET® SpO2, Temperature, and Respiration rate. Masimo SET® (Signal Extraction Technology®) SpO2 provides industry standard Measure-through Motion and Low Perfusion™ Pulse Oximetry to Infinium patient monitors. End-tidal CO_2, Anesthetic Agent measurement, Cardiac Output and Invasive blood pressure can added on-site by simply attaching our plug in modules. This field upgradability can allow the user to customize the monitor's acuity level while the patient's condition changes. If desired, the user can move from a basic vital signs monitor, to a continuous bed side monitor, to an operating room monitor while keeping the patient on a single monitor at all times.

Connective

The **Omni™** offers several connective solutions to network multiple monitors and/or manage patient data on an electronic medical records platform or a HL7 based hospital information system. The **Omni** patient monitor offers Ethernet and RS-232 connections with an open source communication protocol. Infinium offers 2 levels of networking and connectivity. The **Omni** is HL7 compliant. The HL7 network protocol will allow for all patient information and vital sign trends to be transferred and stored on a hospital information system. For non-HL7 medical facilities, there is the Infinium **Omniview™** central station which allows the real time remote monitoring and network of up to 32 **Omni** patient monitors. The **Omniview™** archives full disclosure of all patient vital sign trends. The patient data from the **Omniview™** can be very simply saved, stored, printed, and, transferred.

A Field Upgradable Operating Room Solution
A MONITOR THAT CAN GROW WITH YOU...

Whether it be a basic outpatient procedure or a high acuity cardiac surgery the **Omni™** can be upgraded and custom tailored on-site by the user. The **Omni** is preconfigured with non-invasive blood pressure, 3/5 ECG with arrhythmia detection, impedance respiration, SpO2, and temperature. More advanced readings of End-tidal CO_2, Anesthetic agent measurement, and Cardiac Output Invasive blood pressure can be activated by the user at anytime.

Capnography & Anesthetic Agent Measurement plug in Module:

The Infinium CO_2 module is a field upgradable plug in module that can measure End-tidal CO_2 alone or End-tidal CO_2 with the automatic identification of anesthetic agents (N2O, O2, Sevoflurane, Isoflurane, Desflurane, Halothane, Enflurane)

Both mainstream and sidestream modules are available for End-tidal CO_2 and agent measurement.

Infinium CO_2 utilizes a low flow (50ml/min) sidestream method that allows use for intubated and non-intubated applications. Infinium CO_2 sample line connection incorporates filter cells to eliminate the potential of cross contamination.

Simple connection sample lines allows our CO_2 to be one of the Industry's lowest cost per patient End-tidal CO_2 and anesthesia measurement systems.

Cardiac Output & Invasive Blood Pressure:
2 channels of invasive blood pressure and the facility for thermodilution cardiac output are standard on the **Omni™**.
ECG:

The **Omni™** offers a 3, 5, and 12 lead ECG platform. Arrhythmia detection and ST are also standard and measurable on all lead sets.

- **3-Lead: I, II, III**
- **5-Lead: I, II, III, aVR, aVL, aVF, V**
- **12-Lead: I, II, III, aVR, aVL, aVF, V1~V6 (factory installed)**

INFINIUM®

OMNIVIEW Central Station

SIMPLICITY IN CONNECTIVITY:

The **Omniview™** central station allows the wireless or hard-wired measurement for a network of up to 32 **Omni** patient monitors. The **Omniview™** archives full disclosure of all patient information and vital sign trends. In real time the **Omniview™** displays the patient's numeric vital signs along with waveforms. The patient data from the **Omniview™** can transferred to a EMR as a supplement to the patient's file or integrated into a hospital information system.

The **Omniview™** gives a real time display of all patient vital signs: Heart rate, Last BP reading, SpO$_2$, Temp, EtCO$_2$ and Respiration rate with waveforms.
